

## SELECTION CORPORATE CLOTHING LIMITED

### Ethical Trading Initiative

Selection Corporate Clothing Limited apply standards to our own business and we seek to apply these same standards to those with whom we trade, and in deciding with whom to trade.

The directors of SCC are committed to code of ethics.

We always seek to use suppliers who have suitable accreditation such as SA8000. It is a requirement of all those with whom we do business to demonstrate that they have in place policies, with respect to:

- Business Ethics generally
- Education and training
- Environmental compliance and best practice
- Equality, diversity, non-discrimination, and prevention of harassment
- Health and safety

All of our first tier suppliers are required to answer questionnaires on this subject on engagement and on an annual basis thereafter. They are required to show that they set similar criteria for their own suppliers and service providers. Thus the aim is to demonstrate a commitment to good business ethics throughout the length of the supply/service provision chain.

As well as making enquiries we, or our representative will visit all prospective new suppliers and make our own observations, followed by regular visits to subsequently established suppliers both home and abroad.
